

Toolbox Talk - Erosion & Sediment Control

Project Details

Project Name: _____ Date: _____

Location: _____

Completed By: _____

Purpose: Minimise sediment runoff and protect local waterways.

Key Points:

1. Daily Inspection: Walk the site to check silt fences, sediment traps, and inlet protection. Report any damage immediately.
2. Stockpiles & Exposed Soil: Keep soil stockpiles covered or protected. Avoid placing near drains or waterways.
3. Runoff Control: Ensure drainage paths are clear. Maintain sediment traps and berms.
4. Maintenance: Repair or replace damaged silt fences, inlet protection, and check dams.
5. Record Keeping: Document inspections in the daily site log.

Frequency: Before starting earthworks, then weekly or after heavy rain.

Notes / Observations:
