

Toolbox Talk - Spill & Waste Management

Project Details

Project Name: _____ Date: _____

Location: _____

Completed By: _____

Purpose: Prevent spills, protect workers, and ensure compliance with chemical and waste regulations.

Key Points:

- 1.Storage: Keep all chemicals in labelled containers with lids closed. Use bunding where required.
- 2.Spill Response: Know the location of spill kits and follow the response procedure immediately if a spill occurs.
- 3.Waste Segregation: Separate recyclable, general, and hazardous waste. Dispose of according to site requirements.
- 4.Daily Checks: Inspect storage areas, empty drums, and bins to prevent leaks or contamination.
- 5.Record Keeping: Note inspections and any incidents in the site log.

Frequency: Before handling chemicals, then monthly or when new chemicals are introduced.

Notes / Observations:
